TERRA

HY-PRO GROW & BLOOM NUTRITION FOR SOIL PLANTS

HY-PRO Fertilizers provide plants the essential building blocks for constructing cellular machinery. Plants require only light, water, and about 20 elements to support all their biochemical needs. These 20 elements are called essential nutrients. If for now we set aside leaf fertilization and the three elements gained from the air - oxygen, hydrogen and carbon dioxide, the remaining 13 are all extracted from the substrate and are present in our plant fertilizers. HY-PRO Fertilizers have been tried and tested for the better part of 3 decades and are renowned for their simple solutions.

As is conventional for mineral-based fertilizers, the nutrients are instantly made available to the plant, and the results can therefore be seen very quickly. HY-PRO Terra can be applied throughout the entire growth and flowering cycle ensuring rapid growth, happy plants and healthy chlorophyll.

HY-PRO TERRA IS A POWERFUL FERTILIZER FOR SOIL SUBSTRATES

- ** ESSENTIAL MACRONUTRIENTS FOR ALL HEALTHY PLANTS
HY-PRO TERRA Grow&Bloom nutrition replenishes and maintains essential nutrient levels
- ** A BLEND OF MICRONUTRIENTS FOR PRODUCTIVE PLANTS
HY-PRO TERRA Grow&Bloom Nutrition supports growing healthier crops and happier plants
- ** TO BE USED DURING GROWING AND FLOWERING SEASON
HY-PRO TERRA Grow&Bloom Nutrition is optimized for both the growth and flowering phase

PRODUCT SIZES

250 ML - 500 ML - 1 LITER
5 LITER - 10 LITER
